GLOSSARY OF SPECIES

GROUNDFISH:

CATFISH, Atlantic Wolffish (Anarhichas lupus)
COD, Atlantic (Gadus morhua)
HADDOCK, (Melanogrammus aeglefinus)
HAKE, White (Urophycis tenuis)
HALIBUT, Atlantic (Hippoglossus hippoglossus)
POLLOCK, (Pollachius virens)
REDFISH, Ocean Perch (Sebastes marinus)
TURBOT, Greenland Halibut (Reinhardtius hippoglossoides)
WINTER FLOUNDER, (Pseudopleuronectes americanus)
WITCH FLOUNDER, (Glyptocephalus cynoglossus)
YELLOWTAIL FLOUNDER, (Limanda ferruginea)
AMERICAN PLAICE, (Hippoglossides platessoides)
DOGFISH, (Squalus acanthias)

PELAGIC AND ESTUARIAL:

ALEWIVES, Gaspereau (Alosa pseudoharengus)
EEL, American (Anguilla rostrata)
HERRING, Atlantic (Clupea harengus harengus)
MACKEREL, Atlantic (Scomber scombrus)
SALMON, Atlantic (Salmo salar)
SHAD, American (Alosa sapidissima)
SILVERSIDE, Atlantic (Menidia menidia)
SMELT, American (Osmerus mordax)
TROUT, Rainbow (Salmo gairdneri)
TUNA, Bluefin (Thunnus thynnus)

MOLLUSCS & CRUSTACEANS:

CLAM, Softshell (Mya arenaria)
CLAM, Bar (Spisula solidisima)
CRAB, Queen or Snow (Chionoecetes opilio)
CRAB, Rock (Cancer irroratus)
LOBSTER, American (Homarus americanus)
MUSSEL, Common Edible Blue (Mytilus edulis)
OYSTER, American (Crassostrea virginica)
QUAHAUG, (Mercenaria mercenaria)
QUAHAUG, Ocean (Arctica islandica)
SCALLOP, Sea (Placopecten magellanicus)
SCALLOP, Bay (Argopecten irradians)

OTHER:

IRISH MOSS (Chondrus crispus)
FURCELLARIA (Furcellaria fastigiata)
SEA URCHINS (Strongytocentrotus drobachiensis)

F O R E W O R D

This booklet has been compiled by the Resource Utilization Division of the P.E.I. Department of Fisheries and Aquaculture in an effort to combine information that is often sought by various government agencies and the general public.

Readers are asked to forward any suggestions for future issues of the Statistical Review to the Department.

N.B. It should be noted that figures do not always correspond due to rounding.

STATISTICAL REVIEW OF PRINCE EDWARD ISLAND FISHERY

Prince Edward Island's fishing industry employs over seven thousand people, approximately 4,900 in fishing and 2,400 in processing during 1989. Many more are employed in industries which support the fishery such as outfitting and vessel construction. An economic analysis of the P.E.I. fishery carried out in 1990 revealed that the sales of fresh and processed fish products and indirect benefits associated with the sale of those products generated a total of $226 million for the P.E.I. economy in 1989.

In 1989, landings of fish and seaplants decreased by 2.2 million lbs., providing a total of 124,417,442 lbs. The total landed value of all fishery products in 1989 was $72.4 million, reflecting a decrease of 7.7% compared to 1988's landed value.

The four major categories of fish species are: (1) groundfish, (2) pelagic and estuarial, (3) molluscs and crustaceans, and (4) marine plants.

Molluscs and crustaceans account for 83% of the total value of fishery landings in 1989 and 85% of the total value in 1988. The four major value species of the Island fishery in 1989 were lobster, mussels, oysters, and marine plants. Snow Crab, redfish and cod also contribute significantly to the total value of fishery products.

Total groundfish landings in 1989 increased to 37.3 million pounds representing a 22.8% increase from 1988. The value increased by 28.9% to $6 million. With respect to the dominant groundfish species, increases have been recorded in redfish and hake, while decreases have occurred in landings of cod and flatfish. Redfish landings increased by 64.9% raising the landings from 12.6 million lbs. in 1987 to 20.7 million lbs. in 1989. Cod landings decreased by 4.6% from 8.5 million lbs. in 1988 to 8.1 million lbs. in 1989. The value of cod landings in 1989 dropped by 27.3%. Landings of all flatfish, which include greysole, yellowtails, blackbacks, and flounder have decreased by 4% while the value decreased by 23.7%. Hake landings increased by 0.6 million lbs. or 19.6%.

Landings of all pelagic and estuarial fish decreased to 18.3 million lbs, down from 29.2 million lbs. in 1988, representing a decrease of 37.5%. The value of these landings decreased by 27.2% to $3.2 million. Mackerel landings and landed value increased by 38% while herring landings decreased by 58% with a decrease in value of 76.7%. Eel landings decreased from 341,954 lbs. in 1988 to 238,232 lbs. in 1989. The value of these landings decreased by 38.4% lowering the value to $295 thousand. Smelt landings decreased by 30.7%, however, their value increased by 3.4%. Tuna landings decreased slightly by 0.5% with landings of 136,775 lbs.

Total molluscs and crustacean landings increased by 8% from 33.9 million lbs. in 1988 to 36.6 million lbs. in 1989. The value of these landings decreased by 9.8% from $66.7 million in 1988 to $60.2 million in 1989. The lobster fishery showed a decrease in landings of 3.4% while the value decreased by 17.9% from $56.1 million in 1988 to $46.1 million in 1989. Bar Clam and quahaug landings increased by 1.9% and 24.5% respectively. Rock crab landings decreased from 1,341,629 lbs. in 1988 to 1,003,740 lbs. in 1989. Oyster and snow crab landings increased this year by 29.5% and 26.1% respectively. The value of oysters in 1989, rose to $3.8 million, and the value of snow crab remained the same at $2.4 million. Mussel landings increased by 69.5% in 1989 with an increase in value of 80.8%. Scallop landings increased by 13.4% and their value increased by 2%.

The seaplant harvest decreased in 1989, to 32.7 million lbs.,a decrease of 0.5 million lbs. compared to 1988.

A comparison of landings and values for the various categories is shown in the following tables.

P.E.I.
GENERAL FISHERIES FACTS
1989

Total no. of P.E.I. Fishermen and helpers		4,928
Total no. of Bonafide Fishermen*		1,385
Total no. of Commercial Fishermen**		3,543
Total no. of Vessels - Inshore (<55')		1,466
- Offshore (>55')		3
Licenses by Species:		
Groundfish	931	
Herring	866	
Mackerel	823	
Tuna	361	
Scallops	401	
Lobster	1,308	
Eels	261	
Silversides	33	
Smelts	414	
Snow Crab	16	
Oysters	1,091	
No. of employees in processing plants (approx. maximum in peak season)		2,400
No. of provincially licensed and federally registered export plants (not including buying stations)		37
No. of provincially licensed non-export plants		22
No. of major shellfish shippers		12
No. of trout Hatcheries		5
No. of trout Processors		3
No. of trout U-Fish		3
No. of seaplant companies		4

Bonafide Fisherman

The bonafide fisherman is a fisherman who is registered as a commercial fisherman, and is the holder of a limited fishery licence subject to meeting one of the following three conditions:

(1) is the holder of a Category A lobster fishing license;
(2) showed proof of 75 percent or more of his income from fishing using his own boat and/or equipment except where this boat and/or equipment is not required.
(3) showed proof of sales of fish in 1988 with a landed value in excess of $15,000 using his own boat and/or equipment except where this boat and/or equipment is not required.

Commercial Fisherman

A commercial fisherman is a registered fisherman who does not meet the requirements of a bonafide fisherman.

TABLE XVII
P.E.I. TUNA LANDINGS 1984 - 1989 BY PORT

The following is a summary of the number of tuna landed at P.E.I. ports.

PORT	1984	1985	1986	1987	1988	1989
Tignish	219	95	34	33	98	38
Sea Cow Pond	--	7	12	--	5	8
North Lake	46	39	17	7	--	1
Naufrage	44	34	4	4	--	--
Beach Point	10	4	1	--	--	10
Murray Harbour	1	7	5	--	--	1
Morell	7	15	1	2	--	--
Savage Harbour	1	7	--	--	--	--
Tracadie	--	4	--	--	--	--
Rustico	2	5	--	--	--	--
French River	1	1	--	--	--	--
Souris	--	--	--	--	--	3
Annandale	--	2	--	1	--	1
Graham's Pond	--	1	--	--	--	1
P.E.I. TOTAL	334	221	74	47	103	63
AVERAGE WEIGHT	1,002	1,023	981	971	945	977

Additional to landings made by fishermen at P.E.I. ports, landings were made at Nova Scotia ports as follows: (1984 - 58; 1987 - 7; 1988 - 70; 1989 - 295).
